(916) 993 - 0397

I'm a creative Front End Developer who enjoys writing CSS and strives to create a beautiful, efficient web.

2017-2013

Simply Music LLC

Lead Front End Developer

At Simply Music, I lead the development team in creating new tools for our music teachers and students.

- Set up a new development process that prompted an overhaul of the entire brand.
- Formed an engineering team to create a site that enrolled 7k+ users in the first year.
- Developed 12+ sites all utilizing personal CSS grid system based off Bootstrap.
- Created a custom analytics software, multi-database tools, and 5 WP plugins.

2017

Sacramento TV Network

Full Stack Developer

At SacTV, I manage the functionality of our sites, develop and research future projects, create tools for hosts, and work with local businesses on their tech needs.

- Re-branded promotional materials and logos which led to increased viewership.
- Fully designed and re-developed official site to increase internal efficiency.
- Created submission portals for hosts that decreased publishing time by ~75%

2017-2013

Freelance

Since 2013, I've been a part of over 50 projects and have helped launched websites in music, art, photography, service, TV, and many other different industries.

- Developed product-launching landing pages for an international corporation.
- Contributed to the development of Bootstrap 4 and bbPress.
- Worked with multiple local silicon valley businesses to develop online brands.

2013-2011

Launch Solutions LLC

Jr. Web Developer

At the creative agency, Launch Solutions, I worked on small development projects where I helped develop widgets and tools for clients and their sites.

- Engineered mobile marketing tools for a renowned talent agency.
- Built FAQ system for clients that reduced support emails.
