2018 - 2017

Origin Code Academy
Instructor / Front End Engineer

At Origin Code Academy, I mentor and coach students through learning
software development by developing full-stack JavaScript applications.

- Led UX review and contributed to the development of a learning management system that utilizes MongoDB, Express, React/Redux, and Node.
- Produced material for the curriculum and conducted forums for understanding concepts like async programming, state management, and data flow.
- Instructed students on JS fundamentals, CSS preprocessors, server-side JS, React/Redux, SQL/NoSQL DBs, testing, and agile work environments.
- In collaboration with career services, implemented procedures to train students for careers in software engineering that led to a 100% placement rate.

2017 - 2013

Simply Music LLC
Lead Front End Developer

At Simply Music, I led the international front-end development team,
creating intranets and tools for music teachers and students.

- Set up a new development process that prompted an overhaul of the entire brand.
- Formed an engineering team to create an intranet enrolling 10k users within the year.
- Built a custom analytics solution, multi-DB tools, and PHP template system.

2015

Freelance
Software Developer

Since 2015, I've contributed to the design and development of 50+
sites and have launched apps in music, art, and many other industries.

- Developed landing pages for a prominent international corporation.
- Worked with multiple local silicon valley businesses to develop online brands.

2013 - 2011

Launch Solutions LLC
Web Developer

At the creative agency Launch Solutions, I worked on developing
projects, widgets, and tools for clients and their sites.

- Developed mobile marketing tools for a renowned L.A. talent agency.

SKILLS

ADVANCED

JavaScript	UI/UX Design
React	Node.js
Redux / Context	Express
SCSS / LESS	Agile / Scrum

PROFICIENT

Mentoring	Leadership
React Native	MongoDB
Testing	SQL
Webpack	PHP

EXPLORING

GraphQL	Typescript
Functional Prog.	RxJS
Vue	AWS

OTHER

San Diego JS Co-Organizer
sandiegojs.org - 2018

Instructor for leading U.S. code academy
origincodeacademy.com - 2017

"Trendsetting" e-commerce plugin
anthonyvalera.com/woo - 2015

Web Design Community Award Winner
reddit.com/r/web_design - 2014

PROJECTS

Lightspeed
Website Performance Analysis Tool
anthonyvalera.com/projects/lightspeed

Cool Console Commands
console.log is boring. Try these:
